Principle Based Investing: A Sensible Guide to Investment Success  
Rowman & Littlefield

Investing—the commitment of resources to achieve a return—affects individuals, families, companies, and nations, and has done so throughout history. Yet until the sixteenth century, investing was a privilege of only the elite classes. The story behind the democratization of investing is bound up with some of history's most epic events. It is also a tale rich with lessons for professional and everyday investors who hope to make wiser choices. This entertaining history doubles as a sophisticated account of the opportunities and challenges facing the modern investor. It follows the rise of funded retirement; the evolution of investment vehicles and techniques; investment misdeeds and regulatory reform; government economic policy; the development of investment theory; and the emergence of new investment structures. Norton Reamer and Jesse Downing map these trends and profile the battle between low cost index and exchange-traded funds, on the one hand, and the higher-fee hedge funds and private equity, on the other. By helping us understand this history and its legacy of risk, Reamer and Downing hope to better educate readers about the individual and societal impact of investing and ultimately level the playing field.

This unique study focuses on how the endowment assets of Oxford and Cambridge colleges are invested. Despite their shared missions, each interprets its investment objective differently, often resulting in remarkably dissimilar strategies. This thought provoking study provides new insights for all investors with a long-term investment horizon.

How to overcome barriers to the long-term investments that are essential for solving the world's biggest problems There has never been a greater need for long-term investments to tackle the world's most difficult problems, such as climate change, human health, and decaying infrastructure. And it is increasingly unlikely that the public sector will be willing or able to fill this gap. If these

critical needs are to be met, the major pools of long-term, patient capital—including pensions, sovereign wealth funds, university endowments, and wealthy individuals and families—will have to play a large role. In this accessible and authoritative account of long-term capital investment, two leading experts on the subject, Victoria Ivashina and Josh Lerner, highlight the significant hurdles facing long-term investors and propose concrete ways to overcome these difficulties.

"In crystalline text steeped in cold rage, Sayer takes aim at the REF's central claim, that it is a legitimate process of expert peer review. He critiques university and national-level REF processes against actual practices of scholarly review as found in academic journals, university presses, and North American tenure procedures. His analysis is damning. If the REF fails as scholarly review, how can academics and universities continue to participate? And how can government use its rankings as a basis for public policy?" - Tarak Barkawi, London School of Economics  
"Sayer makes a compelling argument that the Research Excellence Framework is not only expensive and divisive, but is also deeply flawed as an evaluation exercise. Rank Hypocrisies is a rigorous and scholarly evaluation of the REF, yet written in a lively and engaging style that makes it highly readable." - Dorothy Bishop, University of Oxford  
Few decisions are as consequential for the funding and reputation of Britain's universities as those of REF panels. Not only do REF rankings determine the levels of research funding universities receive from the state. They equally affect institutions' ability to attract external grants, top-flight faculty, and graduate students. Whatever benefit the UK's periodic research assessment exercises may have brought to research productivity, the REF has been widely criticized for its enormous costs in taxpayers' money and academics' time, its discouragement of innovative (and especially interdisciplinary) research, and its negative effects on collegiality and staff morale.

Derek Sayer extends these arguments, notably through his discussion of the questionable staff selection processes used in REF2014 within his own university. Where Rank Hypocrisies goes beyond previous critiques is in its open challenge to the REF's claim to provide 'expert review of the outputs' - the very heart of its legitimacy. Examining the composition and operation of REF disciplinary subpanels in forensic detail, Sayer paints a picture in which overburdened assessors assign vaguely defined grades in fields that are frequently not their own while ignoring all external indicators of the academic influence of the publications they are appraising, and then shred all records of their deliberations. Judged against international norms of peer review, the REF is an elaborate charade - and an insult to the core values of the academy.

The recent financial crisis had a profound effect on both public and private universities. Universities responded to these stresses in different ways. This volume presents new evidence on the nature of these responses and how the incentives and constraints facing different institutions affected their behavior.

From a former World Bank Executive and renowned investor—a detailed roadmap to adding consistent, sustainable value to globally diversified portfolios For many investors, alpha is akin to the Holy Grail. Risk-adjusted returns above benchmarks—alpha—are particularly challenging to achieve even with a sound strategy. Hilda Ochoa-Brillembourg is an expert on alpha. Over the past four decades, she and her team consistently exceeded benchmarks and delivered appreciable value added on their investments. In *Delivering Alpha*, she reveals the principles and methods employed in her investment strategies, along with insights drawn from her personal life. She shows how timing, market awareness, price, and relative value to the investor are critical drivers of effective investment decisions. Ochoa-Brillembourg also debunks common investment myths that often trip up both new and experienced investors. *Delivering Alpha* provides practical advice on: •Creating successful decision-making governance to reduce errors and correctly assign responsibilities and incentives •Dealing thoughtfully and effectively with governance challenges •Building the right policy portfolio, specifying desired allocations to each asset class •Structuring asset classes and adding value-oriented or other opportunistic “tilts” •Measuring and managing risks, avoiding common mistakes, and more Light on theory and serious on practice, this book is the culmination of a lifetime’s experience from one of the most successful women in finance. It’s essential reading for investors looking to add sustainable value to globally diversified portfolios.

How can colleges stay relevant in the twenty-first century?

Residential colleges are the foundation on which US higher education is based. These institutions possess storied traditions fondly cherished by students, alumni, and faculty. There is no denying, however, that all colleges today struggle with changing consumer preferences, high sticker prices, and aging infrastructure. Technological and pedagogical alternatives—not to mention growing political pressure—present complex challenges. What can colleges and smaller universities do to stay relevant in today’s educational and economic climate? In their concise guide, *How to Run a College*, Brian C. Mitchell and W. Joseph King analyze how colleges operate. Widely experienced as trustees, administrators, and faculty, they understand that colleges must update their practices, monetize their assets, and focus on core educational strategies in order to build strong institutions. Mitchell and King offer a frank yet optimistic vision for how colleges can change without losing their fundamental strengths. To survive and become sustainable, they must be centers of dynamic learning, as well as economic engines able to power regional, state, and national economies. Rejecting the notion that American colleges are holdovers from a bygone time, *How to Run a College* shows instead that they are centers of experimentation and innovation that heavily influence higher education not only in the United States but also worldwide.

*Colleges in Crisis* describes how the Covid and a shrinking birth rate over the last decade will devastate private colleges and universities if they cannot quickly transform their curriculum, operations, and marketing methods. The book offers two turnaround strategies that have been successfully used over the last twenty years. In addition, the book discusses the obstacles that leaders will face in conducting a transformational turnaround.

Kapitalismuskritik von Robert B. Reich Der Kapitalismus zerstört sich selbst, wenn er auf den Profit der wenigen setzt, sagt Robert B. Reich, Ikone der amerikanischen Linken. Dabei geht es nicht um die Frage, ob wir mehr Markt oder mehr Staat brauchen, sondern wer welche Spielregeln setzt. Denn die Marktregeln, die sich eine Gesellschaft gibt, spiegeln, was sie für gut und fair hält.

Amerika, das kurz vor der Präsidentschaftswahl steht, ist ein zweifelhaftes Vorbild, denn der Unmut in der Bevölkerung über die immer stärkere Machtkonzentration wächst. Sie spaltet Establishment und Anti-Establishment, Arm und Reich. Doch es ist nicht zu spät, den Kapitalismus zu retten: für alle, nicht für 1 Prozent. - Reich warnt ins seinem Buch vor einer gegenwärtigen Entwicklung, die weder ökonomisch noch politisch nachhaltig ist. - Reich ist überzeugt: Politische Ökonomien, die den größten Teil ihrer Gewinne einer kleinen Gruppe an der Spitze zuteilen, sind ihrem Wesen nach instabil. "Reich liefert den schlagenden Beweis dafür, dass die zunehmende Ungleichheit politische Entscheidungen spiegelt, die auch in eine ganz andere Richtung hätten gehen können ... ›Rettet den Kapitalismus‹ ist in unserer gegenwärtigen Lage ein sehr guter Lotse." Female faculty underrepresentation in higher education is perpetuated by gender-based social and professional practices and roles. Existing research confirms gender disparities in faculty recruitment, retention, salary, tenure, and mentorship. This book explores how female, tenure-track faculty navigate the process of balancing their personal and professional lives. Utilizing a qualitative phenomenological approach, the stories of nine female, full-time tenure-track and tenured faculty as well as four administrators employed in faculty diversity, development, and work-life are explored. With a blended application of poststructuralist feminism and work-family border theoretical framework, the book illustrates gender norms, roles, and boundaries as experienced and interpreted by female faculty navigating their work, family, and community spheres of influence. This book highlights the first known study to explore a "new Ivy" institution, and there are no other known studies that incorporate both the qualitative perspectives of female faculty as well as those of the faculty diversity and development

administrators who oversee and develop the very programs and policies that support those faculty. A key chapter in the book, "Baby, It's Cold Inside: Faculty Context & Campus Climate" offers unique insight into what female faculty, and those who love them, face on the path to tenure today. Five thematic findings are overviewed and explored: faculty support comes in many forms; seeking clarity in job elements and teaching, research, service (TRS) ratios; coping strategies in the wake of an overloaded TRS ratio ("Quick meals, late nights, and what gym?"); family borders in the academy, and work-life-family fit: stability, not balance. This work aims to stimulate faculty gender norm consciousness and acknowledge and relay the unique challenges in faculty's pursuit of work-life-family stability, career path navigation, and role negotiation. The author offers an insider's glimpse of modern faculty and administrator lives for the benefit of tenure-track faculty, their departments, their families, and higher education institutions at large. This work aims to better inform university and departmental policy planning and enhance institutional understanding and subsequent support in and of the faculty experience, and thus the experiences of the increasingly diverse students whom educational institutions aim to serve.

Assuming the heritage management role is more than a responsible attitude towards financial capital, it is an attitude in recognition of family culture and values. For those who have before them the challenge and opportunity to pass on this legacy to future generations, the path can certainly be traced very successfully. The purpose of this book is to clarify the principles and practices that greatly increase the success rate in the process of becoming an Investor Family. Through the Family Office, the Investor Family has a transgenerational structure that supports it in the pursuit of its goals in an aligned manner, helping it to continue a successful trajectory build through generations.
