Films with dream sequences, or a dreamlike quality, allow directors to create their own rules of logic and nature to meet a variety of artistic needs. For instance, an opening dream immediately establishes what a character is feeling; a later dream--or series of them--provides viewers with a glimpse of the climax, and a concluding dream ties up loose ends. (In real life, of course, dreams do not occur at such convenient times or serve such useful purposes.) This book explores why science is lost or distorted in the process of representing dreams on film and why audiences prefer this figurative truth of art over the literal truth of science. Part One discusses changes in form and considers the history of dream theory. Additionally, the physiology of sleeping and dreaming, dream structure, sleep deprivation, dreams under the influence of drugs or alcohol, and waking up, as depicted on film, are examined. Part Two investigates changes in content, and delves into the psychology of sleeping and dreaming, dream interpretation, altered states of consciousness, visions and prophecies, dreams as wish fulfillment, sex and death, nightmares, and reality versus illusion. The author uses theories by Freud, Jung, and current experts in her analyses of dream sequences and their use in film.

In *Urban Horror* Erin Y. Huang theorizes the economic, cultural, and political conditions of neoliberal post-socialist China. Drawing on Marxist phenomenology, geography, and aesthetics from Engels and Merleau-Ponty to Lefebvre and Rancière, Huang traces the emergence and mediation of what she calls urban horror—a sociopolitical public affect that exceeds comprehension and provides the grounds for possible future revolutionary dissent. She shows how documentaries, blockbuster feature films, and video art from China, Hong Kong, and Taiwan made between the 1990s and the present rehearse and communicate urban horror. In these films urban horror circulates through myriad urban spaces characterized by the creation of speculative crises, shifting temporalities, and dystopic environments inhospitable to the human body. The cinematic image and the aesthetics of urban horror in neoliberal post-socialist China lay the groundwork for the future to such an extent, Huang contends, that the seeds of dissent at the heart of urban horror make it possible to imagine new forms of resistance.

For millennia people have held folk beliefs about the existence of the doppelgänger--"double walker" in German--a look-alike second self that is often the antithesis of one's identity and is usually considered an omen of misfortune or death. The theme of the double has inspired works by E.T.A. Hoffmann, Poe, de Maupassant, Dostoevsky and others, and has been the basis for many classic mystery, horror and science fiction movies. This critical survey examines the double in more than 100 films by such acclaimed directors as Alfred Hitchcock, Mario Bava, Roger Corman, David Cronenberg, George Romero, Fritz Lang, James Cameron, Robert Siodmak, Don Siegel, John Frankenheimer, Terry Gilliam, Brian De Palma and Roman Polanski.
