### CARLA NIXON

*Lessons Learned from Hurricane Andrew* Dundurn

Got 3 minutes? You'll find the wisdom and encouragement you need with these just-right-sized readings from the classic writings of Andrew Murray! This delightful devotional packs a powerful dose of inspiration into dozens of 3-minute readings designed to meet you right where you are in life. Minute 1: meditate on a scripture selection; Minute 2: read through a devotional created just for you; Minute 3: read a prayer designed to help jump-start your conversation with God. In 3 short minutes, you'll be on your way to complete spiritual renewal!

Learn to build software and hardware projects featuring the Raspberry Pi! Raspberry Pi represents a new generation of computers that encourages the user to play and to learn and this unique book is aimed at the beginner Raspberry Pi user who is eager to get started creating real-world projects. Taking you on a journey of creating 16 practical projects, this fun and informative resource introduces you to the skills you need to have in order to make the most of the Pi. The book begins with a quick look at how to get the Pi up and running and then encourages you to dive into the array of exciting software and hardware projects. Features projects that use Python, which is Raspberry Pi's programming language of choice Includes projects for creating an information center for e-mail, Twitter, Facebook, weather, train times, and more Shows you how to recreate Pong and Pacman or write Tic Tac Toe Teaches you how to use Raspberry Pi's general purpose input/output port in order to speak to external hardware devices Walks you through setting up computer-controlled slot car racing, a swipe card door lock, disco lights, and more Raspberry Pi Projects is an excellent way to dig deeper into the capabilities of the Pi and to have great fun while doing it.

*The Legacy of Jonathan Edwards in the Theology of Andrew Fuller* Oswaal Books and Learning Private Limited

"Bergeron has written a very original book quite unlike any modern study of Johnson. Bound to create quite a bit of controversy among scholars and Civil War enthusiasts, Bergeron seeks to provide a balanced analysis of this much-vilified figure." —John David Smith, Charles H. Stone Distinguished Professor of American History, UNC Charlotte "This book serves as a much-needed reflection on the most recent scholarship on Andrew Johnson and provides the perspective of a historian who has a justifiable claim to be the most prominent expert on Johnson. Bergeron moves beyond simplistic arguments based on Johnson's racism to place his presidency within the politics of the period. He provides a more complex, and effective, perspective on the issues as Johnson tried to pursue the 'politics of the possible.'" —Richard B. McCaslin, author of *Andrew Johnson: A Biography* Few figures in American political history are as reviled as Andrew Johnson, the seventeenth president of the United States. Taking office after the assassination of Abraham Lincoln, he clashed constantly with Congress during the tumultuous early years of Reconstruction. He opposed federally-mandated black suffrage and the Fourteenth Amendment and vetoed the Freedmen's Bureau and Civil Rights bills. In this new book, Paul H. Bergeron, a respected Johnson scholar, brings a new perspective on this often vilified figure. Previous books have judged Johnson out of the context of his times or through a partisan lens. But this volume—based on Bergeron's work as the editor of *The Papers of Andrew Johnson*—takes a more balanced approach to Johnson and his career. Admiring Johnson's unswerving devotion to the Union, Lincoln appointed him as military governor of Tennessee, a post, Bergeron argues, that enhanced Johnson's executive experience and his national stature. While governor, Johnson implemented the emancipation of slaves in the state and laid the foundation for a new civilian government. Bergeron also notes that Johnson developed a close connection with the president which eventually resulted in his vice-

presidential candidacy. In many respects, therefore, Johnson's Civil War years served as preparation for his presidency. Bergeron moves beyond simplistic arguments based on Johnson's racism to place his presidency within the politics of the day. Putting aside earlier analyses of the conflict between Johnson and the Republican Radicals as ideological disputes, Bergeron discusses these battles as a political power struggle. In doing so, he does not deny Johnson's racism but provides a more nuanced and effective perspective on the issues as Johnson tried to pursue the "politics of the possible." Bergeron interprets Johnson as a strong-willed, decisive, fearless, authoritarian leader in the tradition of Andrew Jackson. While never excusing Johnson's inflexibility and extreme racism, Bergeron makes the case that, in proper context, Johnson can be seen at times as a surprisingly effective commander-in-chief—one whose approach to the problems of reestablishing the Union was defensible and consistent. With its fresh insight on the man and his times, *Andrew Johnson's Civil War and Reconstruction* is indispensable reading for students and scholars of the U.S. presidency and the Civil War and Reconstruction periods. Paul H. Bergeron was the editor of the *Papers of Andrew Johnson*, volumes 8–16, from 1987 to 2000. He is the author of *The Presidency of James K. Polk* and coauthor of *Tennesseans and Their History*. He is professor of history emeritus at the University of Tennessee.

Designed for community and career college accounting courses of varying lengths, or low-level four-year college courses. This basic and easy to understand text introduces students to the nuts and bolts of accounting in a friendly step-by-step progression with many exercises that reinforce topics. All basic concepts of accounting are covered and you have four different books to choose from depending on what you want to cover and the length of the course. The text is available in four formats: Chapters 1-10, Chapters 1-15, Chapters 1-20, and Chapters 1-28. Pick the one that's right for your course!

Because of 9/11, there is universal recognition that aviation security is a deadly serious business. Still, around the world today, the practice of aviation security is rooted in a hodgepodge of governmental rules, industry traditions, and local idiosyncrasies. In fact, nearly seven years after the largest single attack involving the air transport industry, there remains no viable framework in place to lift aviation security practice out of the mishmash that currently exists. It is the ambitious intent of *Aviation Security Management* to change that. The goals of this set are nothing less than to make flying safer, to make transporting goods by air safer, and to lay the foundation for the professionalization of this most important field. This dynamic set showcases the most current trends, issues, ideas, and practices in aviation security management, especially as the field evolves in the context of globalization and advances in technology. Written by leading academic thinkers, practitioners, and former and current regulators in the field, the three volumes highlight emerging and innovative practices, illustrated with examples from around the world. Volume 1 takes a penetrating look at the overall framework in which aviation security management has taken place in

the past and will likely do so in the foreseeable future. It covers the major areas of focus for anyone in the aviation security business, and it provides a basis for educational programs. Volume 2 delves into the emerging issues affecting aviation security managers right now. Volume 3: Perspectives on Aviation Security Management covers the full spectrum of international aviation security-related issues. It will serve as part of the foundation for the next generation of research in the area in both a business and cultural context. Collectively, these volumes represent the state of the art in the field today and constitute an essential resource for anyone practicing, studying, teaching, or researching aviation security management.

Eisner and Harvey Award winner! New this month, Francesco Francavilla and Dark Horse celebrate ten years of the acclaimed creator's work! Beloved pulp superhero the Black Beetle returns in a brand new story Kara Bocek! In James Andrew Clark and Enzo Pertile's Winter's Apprentice, an aging exorcist brings his burgeoning granddaughter along for her first mission with surprising results. Plus, this month's issue also features a new Chapel Chronicles story: The Hats of London! Rounding out this issue are new chapters of Paul Levitz and Tim Hamilton's Brooklyn Blood; Kaare Andrews and Troy Nixey's Black Sinister; Rubber Guns by Justin Gray, Jimmy Palmiotti, Keith Goldberg, and Aaron Campbell; and Murder Society by John Nadeau and Dan Jolley!

*Digital Forensics Processing and Procedures* ReadHowYouWant.com

This is the first digital forensics book that covers the complete lifecycle of digital evidence and the chain of custody. This comprehensive handbook includes international procedures, best practices, compliance, and a companion web site with downloadable forms. Written by world-renowned digital forensics experts, this book is a must for any digital forensics lab. It provides anyone who handles digital evidence with a guide to proper procedure throughout the chain of custody—from incident response through analysis in the lab. A step-by-step guide to designing, building and using a digital forensics lab A comprehensive guide for all roles in a digital forensics laboratory Based on international standards and certifications

Experimental Mathematics is a recently structured field of Mathematics that uses a computer and advanced computing technology as tools to perform experiments such as analysis of examples, testing of new ideas, and the search of patterns. The development of a broad spectrum of mathematical software products such as MathematicaR and MapleTM has allowed mathematicians of diverse backgrounds and interests to make the computer an essential part of their daily working environment. This volume represents the AMS Special Session on Experimental Mathematics held in January 2007 in New Orleans. This gathering is part of an annual meeting of a growing number of scientists that have been labeled experimental mathematicians. The guiding principles of the field, some of which are included in the introduction to these proceedings, are similar to those of laboratory experiments in the physical and biological sciences.

Curriculum and Assessment in English 3 to 11: A Better Plan provides an overview of the subject in

considerable breadth and depth, and offers a clear, balanced and forceful critique of the current

language and literacy curriculum and its assessment arrangements for 3- to 11-year-olds in England,

and of developments in the area during the past thirty years. The book restates fundamental truths

about how pupils speak, read and write English with confidence and control. It describes how English

can be taught most effectively, calls for an urgent review of some aspects of the current National

Curriculum and its associated tests, and - crucially - proposes viable alternatives. This invaluable

resource for those working in English, language and literacy education has a wide perspective and

takes a principled and informed pedagogical approach. Based on a series of much-admired booklets

released by the UKLA in 2015, this accessible guide to both theory and practice will be of interest to

teachers, student teachers, teacher-educators, advisers and policy-makers in the UK and

internationally.
